Information about verification and reference PCR:

CEN standard EN 15804 serves as the Core Product Category Rules (PCR)

Product category rules (PCR)

PCR 2019:14 Construction products (EN 15804:A2) Version 1.1

PCR review was conducted by

The Technical Committee of the International EPD® System. See www.environdec.com/TC for a list of members.
 Review chair: Claudia A. Peña, University of Concepción, Chile.
 The review panel may be contacted via the Secretariat www.environdec.com/contact.

Independent third-party verification of the declaration and data, according to ISO 14025:2006:

EPD process verification EPD verification

Third party verifier

Sunil Kumar
 SimaPro partners for India & Sri Lanka, SIPL Pvt Ltd

Approved by

International EPD System Technical Commiee,
 supported by the Secretariat

Procedure for follow-up of data during EPD validity involves third party verifier:

www.semtrio.com

Borusan Mannesmann has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but from different programmes may not be comparable. EPDs of construction products may not be comparable if they do not comply with EN 15804. For further information about comparability, see EN 15804 and ISO 14025.

COMPANY INFORMATION

Owner of the EPD

Borusan Mannesmann Boru Sanayi ve Ticaret A.Ş.

Ata Mh. Sanayi Cd. No: 54/68 16601
Gemlik/Bursa

Contact

Ahu OLGUN
aolgun@borusan.com

The first industrial enterprise of one of Turkey's foremost business conglomerates, the Borusan Group, Borusan Mannesmann marked its 60th anniversary in 2018. Having operated with a global vision since its inception, the company merged its operations with Europe's leading steel and technology firm Salzgitter Mannesmann GMBH in 1998.

Today, Borusan Mannesmann continues its operations as a global brand with 2,038 employees offering more than 4,000 product varieties. Its 7 facilities across 3 continents and high sales volume have placed it on the map as a leading manufacturer in Europe and the world in the steel pipe industry.

Borusan Mannesmann brings its experience, expertise, and passion worldwide with its state-of-the-art pipes addressing all areas ranging from automotive to construction, energy to machinery production. The company continued its investments with a global perspective in accordance with market dynamics and made its first overseas investment in 2001 when it bought the facility in Vobarno and founded Borusan Mannesmann Vobarno Tubi S.p.A. The company then established Borusan Mannesmann Pipe US Inc. in 2014 to manage its Houston Baytown factory investment in the United States. Borusan Mannesmann Pipe US Inc. achieved success soon thanks to its advanced technology and innovative products and won the "Best Pipe Manufacturer" award given by one of the most prestigious publications in the United States, American Metal Market, in 2015, 2017, and 2020.

Having entered among Turkey's pioneering overseas investors with these breakthroughs, Borusan Mannesman both seeks investment opportunities in different countries and aims to boost Turkey's competitiveness.

In addition to its contributions to our country with its exports to various countries in America, Europe, Africa, and Asia, it is also a driving force for the Turkish economy with the development assurance it gives for the coming years.

Having been ranked among Turkey's top 100 industrial enterprises for 50 years, Borusan Mannesmann goes beyond merely manufacturing pipes with its thousands of products, reliable service, quality, and the trails it has blazed in Turkey and the world, and builds Turkey's future. It delivers a sustainable society with its management policies as well as a developed country and a secure future with its large-scale investments.

Production Site

Gemlik

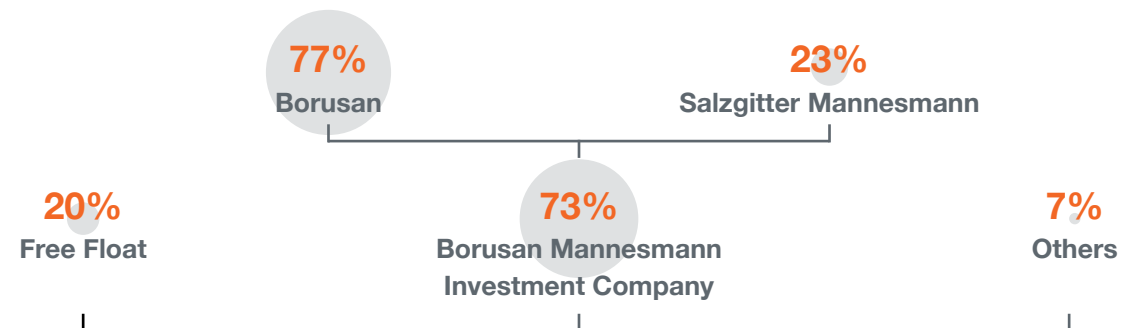

Ata Mah. Sanayi Cad. No: 54/68
16601 Gemlik/Bursa

- Flagship of Borusan Group with more than 60 years of pipe manufacturing experience
- Workforce of 1,800 people
- 20 years of Contract Management competency
- Has its own port (Borusan Port) adjacent to the mill, which brings operational flexibility in terms of logistics inbound and outbound
- Sole 24.5 m single seam API/ISO/EN large diameter line pipe producer in Europe
- Operates with 7 mills; 5 in Turkey, 1 in Italy, 1 in USA

Corporate Structure

Borusan Group and Europe's leading steel and technology company; Salzgitter Mannesmann GmbH, merged their welded steel pipe investments in Turkey and named that partnership; "Borusan Mannesmann Boru Yatırım Holding" in 1998. The company has 73% shares of Borusan Mannesmann Boru San. ve Tic. A.Ş.

 **BORUSAN
MANNESMANN**

PRODUCT INFORMATION

Product Name

ERW Hot Formed Bare Pipes

ERW Line Pipes

Quality Certificates

AD-2000 WO, AD-2000 W4, PED

Tests & Certificates

- Visual and Dimensional Inspection
- Mechanical Tests: Tensile, Flattening, Expanding, Bending Weld Ductility, Fracture Toughness, PP, PE Testing
- Metallographic Examination Purity Analysis
- Chemical Analysis
- Hydrostatic Test
- Non Destructive Inspection: Eddy Current, Ultrasonic Test (Weld Check) Ultrasonic (full body, optional)
- Mill Test Certificates Acc. to EN 10204 2.1; 2.2; 3.1; 3.2
- NDT Standards UT (EN ISO 10893-11 Level U2), ET (EN ISO 10893-2 Level E2), API, EN ISO 3183, CSA Z.245.1

Finishing Operations

- Plain end-square cut
- Bevelled
- Zaplok™
- Threaded and coupled

Threading

60.3 mm ≤ OD ≤ 88.9 mm: API 5L (Line Pipe according to API 5B, API 5CT)

Heat Treatment

21.3 mm ≤ OD ≤ 88.9 mm: full body

Self Anchor

Superior Qualities of Borusan Self Anchor Pipes

- Easy to thread.
- Save time, save labor, save cost.
- Suitable for galvanizing upon special order.
- Satisfying tensile and yield strengths.
- Europe's choice: Thanks to its high standards, Borusan Mannesmann Self Anchor pipes are exported to European countries for years.

Engineering Tubes

Tests & Inspections

- Visual Examination
- Dimensional Inspection
- Metallographic Inspection
- Tensile Test
- Drift Expanding / Flaring Test
- Flattening Test
- Hardness Testing (HV, HRB, HRC)
- Ultrasonic Testing
- Flanging Test
- Chemical Analysis
- Eddy Current Testing
- Surface Roughness Measurement

Tests & Inspections

- Cutting
- End Finishing
- Washing
- Bending
- Drilling
- CNC Machining
- Laser Cutting
- Pressing

Tests & Inspections

- MTC (Mill Test Certificates) acc. to EN 10204 3.1; 2.2

Fire Sprinkler Pipes

Technical Specifications

- FM approved
- UL/C-UL Listed
- NSF certified
- Tight tolerances
- Consistent wall thickness, straightness, roundness
- CE, PED certified
- Pressure tested
- Reliable high steel quality
- Plain Ends, Grooved or Threaded & Coupled
- Custom length availability

Fire Sprinkler Pipe Specifications

- ASTM A53 & ASTM A795 production standards available; Light wall, Sch7, Sch10, Sch30, Sch40 and Sch 80
- EN 10217 & EN 10255 production standards available; Light wall, light, medium, heavy series
- Easy to weld & install
- Saves labor, time and cost
- Pressure ratings exceeding 300 psi
- Compatible for use in wet, dry, preaction and deluge sprinkler systems
- Plain end, roll grooved, threaded & coupled
- Custom length available
- Tight tolerances
- Consistent roundness, straightness and wall thickness
- Reliable high steel quality
- Inside weld bead can be removed
- Pressure tested

Sizes

ERW Line Pipes	Self Anchor	Fire Sprinkler Pipes
Outside Diameter 20mm - 88.9mm	Outside Diameter 20mm - 88.9mm	Outside Diameter 21.3mm - 88.9mm
Wall Thickness 1.9mm - 10mm	Wall Thickness 1.9mm - 10mm	Wall Thickness 1.9mm - 10mm
Length 3.00m - 12.80m	Length 3.00m - 12.80m	Length 3.00m - 12.80m

Technical Specifications

Production Standards	Steel Grades
ERW Line Pipes	
API 5L (PSL 1, PSL 2)	Up to X70
API 5CT	J55
CSA Z 245.1	Up to Gr 359
EN ISO 3183	Up to L485 M, ME
SI 530	Grade B
Self Anchor	
EN 10210	S355JRH, 28Mn6
EN 10219	S355JRH, 28Mn6
Engineering Tubes	
EN 10305-3, EN 10305-2, EN 10305-5	S235JR, S275J2, S355J2, DC01, DC03, DC04, S315MC - S700MC, HC260LA - HC2500LA, DP500 - DP1000, 20MnB5, 22MnB5, 26MnB5, 30MnB5, 34MnB5, DX51, DX52, DX53, S220, S350
Fire Sprinkler Pipes	
ASTM A53, ASTM A795	Grade A, Grade B
EN 10217, EN 10255	P195, P235, P265, S195

LCA Information

Declared unit

1 tonne (1000kg) of fabricated steel product manufactured in Gemlik facility (TR).

Reference service life

Not applicable

Time representatives

The production data in this LCA study represents the period of 1st January 2021 and 30th September 2021.

Database(s) and LCA software used

Simpro v9.2 and Ecoinvent v3.7.1

Description of system boundaries

Cradle to gate (A1-3) with options, modules C1-C4, module D.

Data quality and data collection

According to EN 15804:2012+A2:2019 specific data was used for module A3 (Processes the manufacturer has influence over) and was gathered from Borusan Mannesmann Gemlik plant. Specific data includes actual product weights, amounts of raw materials used, product content, energy consumption, transport figures, water consumption and amounts of wastes. For A1 and A2 modules, according to EN 15804:2012+A2:2019, generic data was applied and was obtained from Ecoinvent v3.7.1

Allocation

Mass allocation has been applied for preconsumer recycled materials according to EN 15804:2012+A2:2019.

Cut-off rules

Life Cycle Inventory data for a minimum of 99% of total inflows to the three life cycle stages have been included and a cut-off rule of 1% regarding energy, mass and environmental relevance was applied. Impacts caused by treatment operations have been calculated lower than 1% environmental relevance.

Modules declared, geographical scope, share of specific data (in GWP-GHG indicator) and data variation

	Product Stage			Construction Process Stage		Use Stage							End of Life Stage				Resource Recovery Stage
	Raw Material Supply	Transport	Manufacturing	Transport from the gate to the site	Assembly	Use	Maintenance	Repair	Replacement	Refurbishment	Operational Energy Use	Operational Water Use	De-construction	Transport	Disposal	Waste Processing	Reuse - Recovery - Recycling Potential
Modules	A1	A2	A3	A4	A5	B1	B2	B3	B4	B5	B6	B7	C1	C2	C3	C4	D
Modules Declared	X	X	X	ND	ND	ND	ND	ND	ND	ND	ND	ND	X	X	X	X	X
Geography	GLO	GLO	TR	-	-	-	-	-	-	-	-	-	GLO	GLO	GLO	GLO	GLO
Specific data used	>99.5%			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation-products	Not Relevant			-	-	-	-	-	-	-	-	-	-	-	-	-	-
Variation-sites	Not Relevant			-	-	-	-	-	-	-	-	-	-	-	-	-	-

System Diagram

Description of Raw Materials

A1 - Raw Materials Supply

This stage takes into account raw material extraction, processing and energy used in the production process.

A2 - Transport to the Manufacturer

This stages include transportation of the raw materials from supplier to factory gate. Transportation types are considered as seaway, road, etc.

A3 - Manufacturing

This stage includes energy and water consumption during the manufacturing process. Additionally, packaging materials are covered by this stage. Followed production processes are as;

- Tape slitting section
- Welding

C1 - De-construction

The dismantling of steel pipe has a very low impact considering the impact throughout the life of the installation. It is assumed that, in C1 module, same electricity and diesel is consumed as during the construction installation of steel pipe.

C2 - Transport to Waste Processing

An average distance of 100km has been assumed for the transport to recycling facility. Transport is calculated on the basis of a scenario with the parameters described in the table below.

Parameters C2 Module	
Transport by road*	Lorry >32 metric ton
Distance (km)	100
Database	Ecoinvent v3.7.1

*Technology is euro 6

C3 - Waste Processing for Reuse, Recovery and/or Recycling

The material and energy expenses required for Module C3 are negligible. It is assumed that there is no sorting or processing required for steel pipes.

C4 - Final Disposal

100% of used product after the lifetime will be collected and recycled into the manufacturing system. It is assumed that 5% of the product is lost during de-construction and 95% is reached to recycling system.

D - Reuse, Recovery or Recycling Potential

Scrap inputs to the production stage are subtracted from scrap to be recycled at end of life in order to obtain the net scrap output from the product system. This remaining net scrap is then delivered to recycling process. Module D reports the environmental aspects of recycled scrap generated at the end of life minus that used at the production stage.

Information on Which Life Cycle Stages Are Not Considered

This EPD only covers the Cradle to Gate A1-3, C1-4 and D stages because other stages are very dependent on particular scenarios and are better developed for specific building or construction works.

Content Declaration

Content declaration of 1000kg of ERW Steel Pipe	
Material	Share
Steel Coil	99.0 - 99.9%
Renewable Material	0%
Biogenic Carbon	0%

*The product does not content "Candidate List of Substances of Very High Concern (SVHC)" compounds.

ENVIRONMENTAL PERFORMANCE

Potential Environmental Impact

Mandatory Indicators According to EN 15804

Results for 1000kg of ERW Steel Pipe							
Indicator	Unit	A1:A3	C1	C2	C3	C4	D
GWP-fossil	kg CO2 eq	2683	1.28	8.67	0	0.262	-1647
